Hon. Commissioner of Patents  
 and Trademarks  
 Washington, D.C. 20231

INFORMATION DISCLOSURE STATEMENT

Applicant wishes to bring to the attention of the U.S. Examiner references which have come to the Applicant's attention as a result of corresponding examination procedures. No fee is required at this time.

U.S. 5,412,490 discloses a printer provided with an image reading unit.

U.S. 5,602,650 discloses an information processing apparatus equipped with detachable image reader.

U.S. 5,663,811 discloses a facsimile device having automatic detection of regular and manual scanning modes.

U.S. 4,989,237 discloses an image data transmission apparatus.

U.S. 5,321,485 discloses a printing apparatus having manual sheet feeding and document reading capabilities.

U.S. 5,711,516 discloses a sheet feeder having a sloping sheet support side for use with

detachable image scanner.

U.S. 5,884,117 discloses an image forming apparatus.

U.S. 5,412,205 discloses a scanner with a wing shaped fluorescent tube housing and dual faceted scan window.

U.S. 5,954,326 discloses a three stage shifting device for a multifunction office equipment.

U.S. 5,644,663 discloses a portable image scanner having manual or automatic feed.

U.S. 5,166,812 discloses a fax machine with retractable drawer.

U.S. 5,559,609 discloses a facsimile transceiver.

U.S. 5,889,597 discloses an imaging processing apparatus and system having a detachable scanner unit.

Japanese Publication 61-251356 discloses a scanner element with a motor 1 connected to a machine frame 20 driven through a timing pulley 7 in the timing belt. Photoelectric conversion element 5 is provided. Applicant attaches a translation of the specification. No full translation of this reference is available to Applicant at this time.

Japanese Publication 63-42275 discloses a scanner arrangement with structure to obtain a stable scan speed. Applicant attaches a translation of the specification. No full translation of this reference is available to Applicant at this time.

Japanese Patent Publication 2-226958 discloses a scanner arrangement with a paper feed mechanism. Applicant attaches a translation of the specification. No full translation of this reference is available to the Applicant at this time.

Japanese Patent Publication 02-22958 discloses a scanner element with a self traveling type reader. Applicant attaches a translation of the specification. No full translation is available to Applicant at this time.

Japanese Patent Publication 4-117764 discloses a scanner arrangement with an automatic feeder. Applicant attaches a translation of the specification. No full translation of this reference is available to Applicant at this time.

PCT Patent Publication WO 88/01123 discloses a handheld image reader. This document includes an English abstract. No full translation of this reference is available to Applicant at this time.
